7-DAY VERIFIED EVENT PILOT AGREEMENT

Ref: VVU-PIL-BRB-001 Date: [Date] Draft for discussion; to be reviewed by each party's attorney before signing.

Service Provider: Venture Vision Ubuntu (VVU), [Registered entity name], Reg. [No.], [Address], represented by [Name, Title].
Client: [Broubart legal entity name], Reg. [No.], [Site address], represented by [Name, Title].

1. Objective

A 7-day pilot on one (1) iCentre operator station (the "Pilot Scope") to capture alert, acknowledgement, escalation, dispatch and closure events and issue tamper-evident, hash-chained receipts to a write-once ledger, producing a Verified Evidence Pack.

2. VVU Deliverables

(a) Setup, commissioning and removal of any VVU edge component. (b) Receipting of the events in the Pilot Scope. (c) On Day 7: a sample client-facing evidence report and a chain-verification report that the Client can re-run independently.

3. Client Obligations

(a) Provide a read-only copy of the event data (export or API) from the Client's existing platform within 5 business days of signing. (b) Nominate one technical and one commercial contact. (c) Complete the Client's own IT/security approvals before connection. (d) Provide the Client's own event log for the pilot period for reconciliation.

4. Read-Only Principle

VVU's component is passive and read-only. It does not write to, control, alarm, dispatch or alter any Client system. The evidence layer is supplementary and does not replace any existing system of record or operating procedure.

5. Pilot Fee

R[Amount] excl. VAT, payable before commencement. If the Client signs an Annual Subscription within 14 days after Day 7, 100% of the Pilot Fee is credited to the first invoice. Cancellation before commencement: refund less documented costs. After commencement: non-refundable.

6. Success Criteria (2 of 3)

(i) at least 95% of in-scope events receipted within [60] seconds of the source event timestamp; (ii) 100% of sampled events in the Client's own log have a matching receipt; (iii) the Client's staff independently re-run chain verification successfully. Measured from ledger data against the Client's own log. Client-side outages, denied access or data gaps extend the pilot day-for-day and are not a VVU failure. Meeting the criteria creates no obligation to subscribe.

7. Data Protection (POPIA)

The Client is the Responsible Party and VVU the Operator; VVU processes personal information only on the Client's written instructions and under appropriate security safeguards (POPIA ss. 19-21). **No personal information is in scope:** no video, images, number plates or biometric data. Operator identities are replaced by pseudonymous tokens. Anything further requires the Client's written confirmation of lawful basis and a signed amendment. Processing location: [South Africa only]. Security compromise is notified within [48] hours of awareness.

8. Liability

The pilot is a monitoring and evidence service with no guarantee of security, response or compliance outcomes. VVU's aggregate liability is capped at the Pilot Fee, except for gross negligence, wilful misconduct or liability that cannot be limited by law. Neither party is liable for indirect or consequential loss. VVU holds [insurance cover: R amount] and will provide a certificate on request.

9. Term and Termination

Runs 7 days from commencement. Either party may terminate for uncured material breach on 3 days' written notice. On conclusion VVU removes its components; the Client keeps the Evidence Pack and the ledger records generated for it.

10. Confidentiality and IP

Non-public information of either party stays confidential for 3 years after expiry. VVU retains all IP in its software, ledger architecture and firmware; the Client retains ownership of its data. No public use of either party's name or logo, and no case study, without written consent.

11. General

Governing law: Republic of South Africa. Entire agreement; amendments in writing. Disputes: good-faith escalation (14 days), then mediation, then the courts of [jurisdiction].

12. Acceptance
