# CHANNEL PARTNER TERM SHEET: VERIFIED-STATE OPTION

Ref: VVU-CHN-[Partner code]-001  Date: [Date]  Non-binding except sections marked binding. For discussion; attorney review required.

**VVU:** Venture Vision Ubuntu, [entity], Reg. [No.]. **Partner:** [Durr Africa entity or equivalent], Reg. [No.], represented by [Name, Title].

| Item | Proposed term |
|---|---|
| Offer | "Verified-state option": a VVU edge node and ledger receipts offered as an add-on to cells the Partner delivers. |
| Pilot | 30-day integration pilot on one (1) Partner-delivered cell at one (1) end-customer site, with that customer's signed consent (page 2). |
| Integration | Read-only. No change to the Partner's control software or warranty-relevant configuration. The Partner confirms in writing that connection of a passive read-only node does not affect its warranty or support terms. |
| Pilot deliverables | Integration specification; one end-customer Evidence Pack; installation time per cell measured. |
| Success | Installation within [N] hours per cell; no interference with the Partner's system; end-customer accepts the Evidence Pack. |
| Commercial model | [Per-cell annual subscription with revenue share of X% to the Partner, or reseller margin of X%]. To be agreed in a separate channel agreement; nothing here commits either party. |
| Exclusivity | None during the pilot. Any exclusivity requires a separate signed agreement. |
| Support split | VVU: node, ledger, evidence tooling. Partner: first-line customer contact and site coordination. |
| Intellectual property | Each party keeps its own IP. Joint materials are agreed in writing first. |
| Pilot fee and deposit | Charged to the end customer under the VVU Pilot Agreement (5% good-faith deposit). The Partner pays no fee for the integration pilot unless agreed in writing. |
| Binding terms | (1) Confidentiality: the mutual NDA applies to everything exchanged. (2) No public use of either party's name or logo without written consent. (3) Governing law: Republic of South Africa. All other terms are non-binding. |

*Positioning line: "Every cell you ship can carry an independently verifiable record of what it did, with no change to your control stack." This is a proposal, not a claim that the Partner has agreed or will resell.*

# END-CUSTOMER CONSENT FOR PILOT INSTALLATION

Ref: VVU-CHN-[Partner code]-001-C  Required before any node is connected to a Partner-delivered cell.

The undersigned end customer ("Customer") consents to the installation of one (1) passive, read-only VVU edge node on the cell described below for a 30-day pilot, and acknowledges:

1. The node reads signals and events only. It does not write to or control the cell, and does not replace any Customer or Partner system.
2. The Customer's own safety, IT/OT security and change-management approvals are completed before installation (see the Site Safety and IT/OT Approval Checklist).
3. Data captured is event and measurement metadata for the Customer's own cell, held under the mutual NDA between the Customer and VVU. No personal information is in scope unless a signed Variation Form and POPIA Operator Agreement say otherwise.
4. The Customer is not charged by the Partner for the integration pilot. Any fee or deposit is as stated in the VVU Pilot Agreement between the Customer and VVU.
5. The Partner has been informed and has confirmed that connection of the node does not affect its warranty or support terms.
6. The Customer may withdraw consent and require removal of the node on 3 days' written notice.
